

**La Madre Mountain Wilderness  
and  
Rainbow Mountain Wilderness**

**Public Participation**

Addressing these questions will help you formulate your input to the plan:

- How and where do you use the wilderness?
- What do you value about the area?
- What current conditions or situations exist in the wilderness?
- Do you feel management attention is currently needed to maintain or enhance the wilderness character of the area?
- What potential future changes should the agencies monitor for, and take action on should they materialize?
- What management actions do you consider to be appropriate?

Please consider the following wilderness characteristics when formulating your input:

1. Untrammeled: wilderness ecosystems are unhindered and free of human manipulation.
  2. Outstanding opportunities for solitude or a primitive and unconfined type of recreation: wilderness provides opportunities for people to experience solitude or primitive and unconfined recreation, including the values of inspiration and physical and mental challenge.
  3. Undeveloped: wilderness is substantially without permanent developments or modern human occupation.
  4. Natural: wilderness ecological systems, being affected primarily by the forces of nature, retain their primeval character and influence substantially free from the effects of modern human civilization.
  5. Special Features: wilderness may include ecological, geological, or other features of scientific, educational, scenic or historical value
- Site and activity specific input is most useful to the plan.
  - Please provide your input no later than June 30, 2006.
  - Any format will be accepted, you do not need to use this form.

Submit your input at a public meeting or to:

James Sippel
